WEB231 – Enterprise JavaScript I

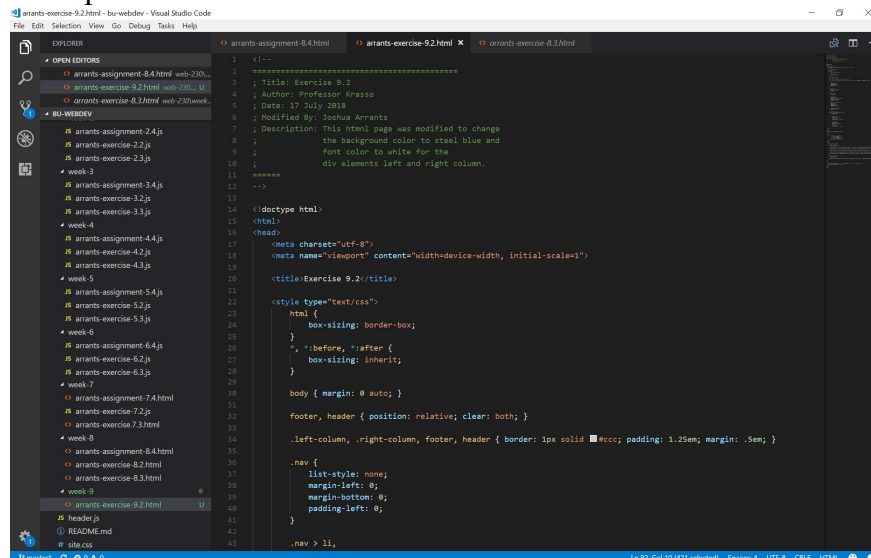

Exercise 9.2

Instructions on how to change the left/right column background and font color:

1: Open a software application that allows you to edit html code.

Example:

2: Within the html code, find the css code for the div elements left-column and right-column.

Example:

```
.left-column {  
  margin-right: 20em;  
  float: left;  
}  
  
.right-column {  
  width: 18.75em;  
  margin-left: -19.3em;  
  float: left;  
}
```

3: Within the css code for the left and right column, apply the style to change the background and font color.

Example:

```
.left-column {  
  margin-right: 20em;  
  float: left;  
  color: white;  
  background-color: steelblue;  
}  
  
.right-column {  
  width: 18.75em;  
  margin-left: -19.3em;  
  float: left;  
  color: white;  
  background-color: steelblue;  
}
```

4: Save the file, and run the html page in a web browser.
